

EXPLOITATION OF IQMULUS RESULTS

New technologies for visualization and big data analysis of large land, marine and urban point clouds in the Cloud.

Bergen, 21 September 2016
Quillon Harpham, HR Wallingford

The research leading to these results has received funding from the European Union Seventh Framework Programme (FP7/2007-2013) under *grant agreement* n° 318787.

- **Clarity** on the nature of the exploitable outcomes arising from the project;
- **Empowerment** of the project partners to exploit;
- **Simple**, flexible and lightweight;
- Consistent with the **Grant Agreement** and **Consortium Agreement** signed at the commencement of the project;
- **Realistic** and consistent with business and risk analysis.

Centre of Competence Agreement (CoCoA)

- Manages any changes to the exploitation situation following the conclusion of the project.

Licencing and Transfer for Exploitation (LiTE)

- Governs ownership, licencing and transfer of the inventory of exploitable outcomes.

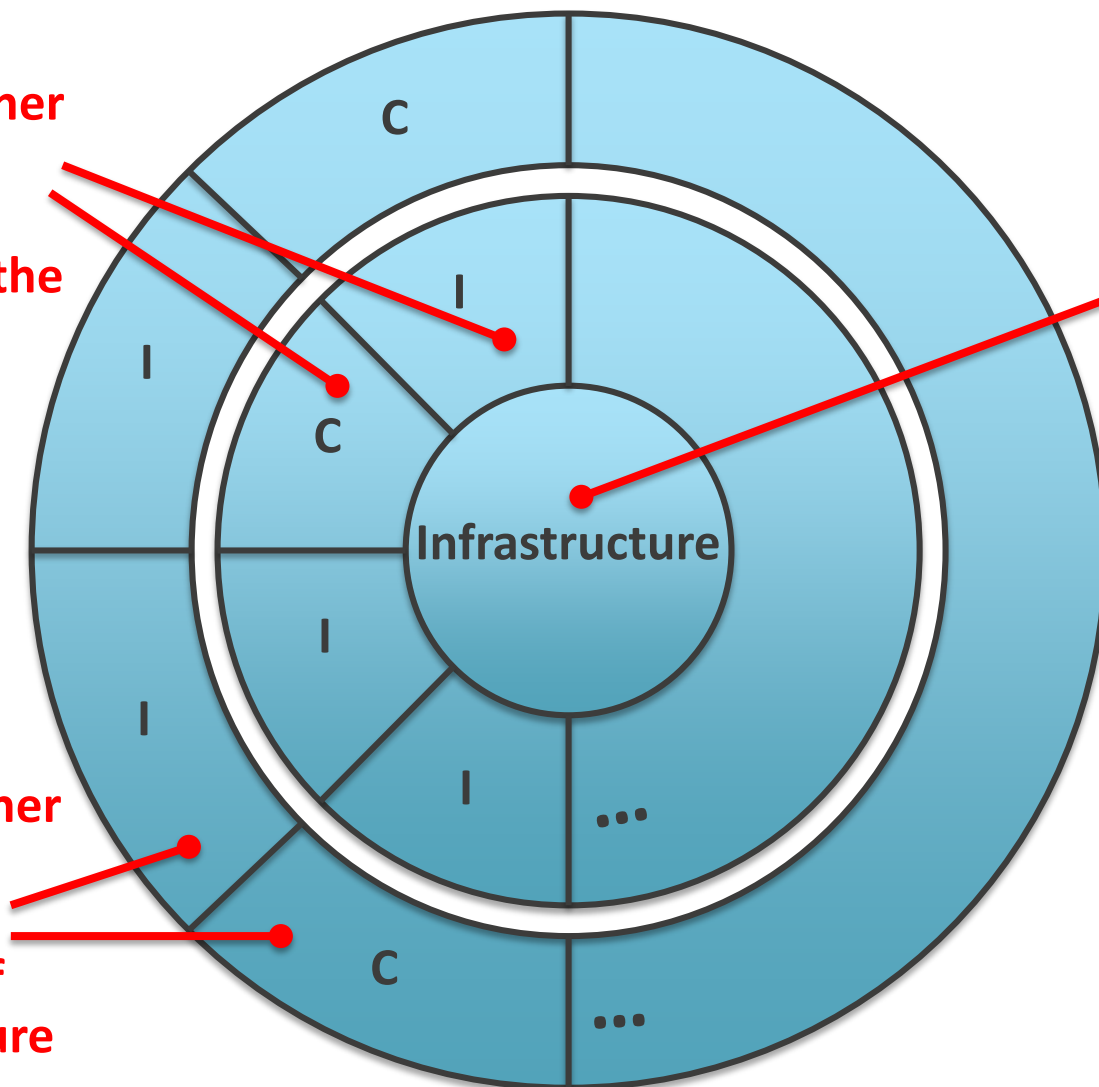

The *CoCoA-LiTE exploitation framework* is offered as an additional project outcome in its own right.

- **DaaP – Data as a Product**
Exploitable outcomes which are direct data products.
- **DaaS – Data as a Service**
Data products delivered through a service interface.
- **SaaP – Software as a Product**
Software components for local installation.
- **SaaS – Software as a Service**
Software components executed as a service.
- **PaaP – Platform as a Product**
A set of components acting as a software platform, installed locally.
- **PaaS – Platform as a Service**
A set of components acting as a software platform, accessed through a service interface.

Common and Individual partner exploitable outcomes dependent on the Infrastructure

Common exploitable outcome (IGD and MOSS)

Common and Individual partner exploitable outcomes independent of the Infrastructure

“...engagement with the two most relevant OGC working groups (Point Cloud and Big Data) has indicated that the associated communities are some way off producing formal standards and toolsets which could be shaped by IQmulus partners.”

IQmulus Exploitation Plan version 3.

- IQmulus Selling Point is the presence of leading-edge workflow solutions to ‘Point Cloud, Coverage and Volumetric Data’ processing aspects of the geospatial data market place.
